Information

For best results fully charge before first use.

The best charge is obtained in direct sunlight, Anklelite will take 4 to 5 times as long to charge in artificial light.

Light will remain on 3 times as long in flash mode rather than constant mode.

There are no serviceable parts on the Anklelite. Do not attempt to open the light module.

Charge will deplete over time if left without a light source.

Clean with soft cloth and mild detergent

Anklelite

For best results charge in Direct Sunlight where possible

Switch 1: Mode

Switch 2: Charge - On
